

Course Name: Correctional Health Care Annual Training (CHCAT)

Course Summary:

This course will provide an update on health care concerns related to youth detained in our juvenile detention facilities. The instructors have vast experience working with detained youth and a wealth of education, Master Degrees or above in Mental Health or Social Sciences.

Performance Objectives

Trainees will be able to identify different types of breathing by matching definition with the symptoms. They will be able to list the steps an officer should following a hemorrhagic emergency. Demonstrate correct application of tourniquets. Trainees will also be able to identify, assess and manage suicide risk and ideology. Learn the Crisis intervention techniques and de-escalation.
